

# Building a Caterpillar

1. Cut out your leaf shape from template 1.
2. Draw any additional patterns for your caterpillar on template 2.
3. Cut out template 2.
4. Pick up 1 strip you cut from template 2. Match the short ends together forming a circle. Tape the ends. Repeat until all 6 strips are folded into circles.
5. Pick up 1 circle and using a glue stick attach it towards the bottom of your leaf.
6. Glue on your googly eyes
7. Take your pipe cleaner and match the two ends. Now spread it out into the shape of a "V". Tape the pipe cleaner with the bottom of the "V" facing down to the back of the first circle creating the antennae for your caterpillar.
8. Continue to glue the remaining circle behind the first circle.

**Template 1**  
Cut along the dotted lines on this leaf template.

**Template 2**

- 1. Draw any additional patterns you'd like for your caterpillar.**
- 2. Cut along the dotted lines on this leaf template.**
